

Kunal Dagar

AI Data Analyst | Data Analyst | Immediate Joiner
New Delhi | +91 9315005650 | kunaldagar038@gmail.com | [Linkedin](#)

EDUCATION

MBA Data Science Amity University Online	2024 - 2026
B.Tech. Computer Science and Engineering Manav Rachna International Institute of Research and Studies	2020 - 2024

WORK EXPERIENCE

Business Analyst (The Coca-Cola Company) Decision Point Analytics	Dec 2025 – Apr 2026 Gurugram, Haryana
- Analyzed 900K+ retail records using Python, SQL, and Power BI to generate sales, distribution, and market-share insights across retail datasets. - Developed AI-assisted dashboards tracking ND, WD, Volume, Value, and Market Share KPIs, enabling faster stakeholder reporting and performance analysis. - Built automated ETL and SQL reporting workflows, reducing manual analysis effort by 35–40% and improving reporting scalability.	
Data Analyst Smartprep Academy	Apr 2025 – Jun 2025 Remote
- Automated reporting workflows using Python and Google Sheets API, improving reporting efficiency by 40%. - Analyzed 1,000+ student records using SQL and Python to identify behavioral and performance trends. - Built interactive Power BI dashboards, reducing manual KPI tracking effort by 30% and improving reporting visibility.	

PROJECTS

POSIST Reporting Process Automation [Python, Playwright, Pandas, Gmail API, Power Query, Power BI]	Jun 2026
- Automated the extraction and collection of 55+ monthly operational reports (11 outlets × 5 report types) from POSIST using Playwright and Gmail API, eliminating repetitive manual report-generation tasks. - Developed Python and Pandas-based data processing workflows to clean, standardize, and merge multi-outlet datasets, reducing report preparation time from ~2 hours to ~20 minutes (83% reduction). - Delivered a manager-adopted reporting automation solution integrating Power Query and Power BI workflows, improving reporting efficiency and accelerating dashboard-ready data availability for business analysis.	
AI-Powered Automated Analytics Dashboard [Python, Pandas, Streamlit, SQL, GenAI, LLM, Groq]	May 2026
- Built a GenAI-powered analytics platform processing 10K+ rows of business data with conversational insight generation using Groq and OpenAI LLM. - Automated ETL pipelines, KPI reporting, and dynamic CSV ingestion workflows, reducing manual reporting effort by 50%. - Developed Streamlit dashboards enabling natural-language querying and AI-generated analytical summaries for faster business decision-making.	

SKILLS

AI & ML: Generative AI, LLM Applications, NLP, Machine Learning, Predictive Analytics, Prompt Engineering
Programming: Python, SQL, Pandas, NumPy, Scikit-learn
Analytics & BI: Power BI, KPI Dashboards, Data Visualization, Reporting Automation
Data Engineering: ETL Pipelines, Data Cleaning, Workflow Automation, Power Query
Tools: Streamlit, Git, Jupyter Notebook, Google Sheets API
